Noida, India

CORE COMPETENCIES

- Software Development Lifecycle
- Requirements Elicitation
- Product Design & Development
- Front-end & Back-end Development
- UI / UX / Design Patterns
- Coding / Programming
- OOPS & Algorithms
- API Design, Integration & Deployment
- Performance Optimization
- Security Compliance
- Agile & Scrum Methodologies
- Sprint Planning
- Backlog Management
- Version Control & CI/CD
- UAT Testing & Debugging
- Client Communication
- Reporting and Documentation
- Team Trainings & Leadership

IT SKILLS

Node JS > Angular JS > PHP

MySQL > JavaScript > GIT

JIRA > Docker > CodeIgnitor

Laravel > Cake

MANAGERIAL SKILLS

Analytical & Problem-solver ▪▪▪▪

Decision-maker ▪▪▪▪

Communicator & Adaptable ▪▪▪▪
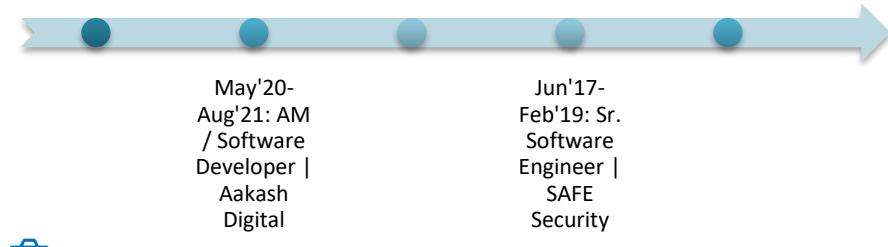

EXECUTIVE SUMMARY

An indigenous IT professional with **9+ years** of extensive experience in **solution architecture & full-cycle software development** across **diverse domains** such as **EdTech, Fintech, Cyber Security & E-commerce**. Proven track record of leading end-to-end **development of complex, scalable IT products** while driving engineering excellence & performance optimization. Adept at managing **multitenancy architectures**, creating **user-friendly UI / UX**, enhancing **backend efficiency**, and solving critical system issues.

A strong team manager with expertise in **Agile and Scrum methodologies**, **project management**, and **business analysis**. Successfully delivered high-impact projects for **global clients** by collaborating with cross-functional teams and aligning them with organizational goals. Awarded for building and revamping mission-critical applications by championing complete **revamp of 2 major startup products** from the ground up, focusing on designing scalable architectures and optimizing performance to meet user demands & business objectives. Meticulously **improved performance up to 10x** through **database & code optimization**. Known for working in startup environments, combining technical acumen with **leadership to drive innovation, scalability, and product success**.

CAREER TIMELINE

Since Aug'21: Teach Lead | DRISHTI IAS

Feb'19-Apr'20: Sr. Software Engineer | Policy Bazaar

Jan'16-Jul'17: Software Engineer | Unyscape Infocom

May'20-Aug'21: AM / Software Developer | Aakash Digital

Jun'17-Feb'19: Sr. Software Engineer | SAFE Security

EMPLOYMENT NARRATIVE

Teach Lead | DRISHTI IAS (VDK Eduventures)   **Since Aug'21**
Project: Drishti Learning App (DLA)
Responsibilities & Significant Achievements:

- Act as the founding tech member for the Drishti Learning App (DLA) into a full-fledged tech startup under VDK Ventures Pvt. Ltd.
- Managing a **cross-functional team of 5-7 members,** and overseeing all technical aspects of the **product development lifecycle**.
- Coordinate between clients, stakeholders, developers & designers to ensure seamless **project execution** in line with **project requirements**.
- Orchestrated **end-to-end application design** with key focus on scalability, security, and user experience.
- Single-handedly **develop APIs using Node.js** and build responsive front-end interfaces using Angular, enhancing user experience.
- **Optimize application code** for multiple modules, improving performance and **reducing load times by up to 10x.**
- **Debug critical issues** to maintain system stability and reliability.

Assistant Manager - Software Developer | Aakash Digital / BYJU'S   **May'20 – Aug'21**

Project: Multiple projects for Developing Aakash Mobile and Web Applications
Responsibilities & Significant Achievements:

- Developed both **front-end and API** to deliver seamless user experiences for Aakash mobile and web applications.
- Designed, developed, and optimized APIs to ensure high performance, scalability, and reliability for Aakash's applications.
- **Integrated APIs with various application components**, enabling a seamless flow of data and functionality.
- **Optimized live test series module** by optimizing user interactions & ensuring engaging experience for students and educators.
- Proactively **debugged errors** in the live system, implementing critical fixes to ensure system stability and minimize downtime.
- Supported the organization's **digital transformation** by ensuring smooth functionality across mobile and web applications.

Sr. Software Engineer | Policy Bazaar   **Feb'19 – Apr'20**

Project: PB Life (Policy Bazar CMS and Portal)
Responsibilities & Significant Achievements:

- Front-led the development of PolicyBazaar's Newsletter website for PolicyBazaar, showcasing articles and achievements, with a focus on seamless user experience and functionality.
- Leveraged technologies such as **CodeIgniter, MySQL, JavaScript, AJAX**, and integrated advanced features and third-party libraries to enhance website performance, interactivity, and responsiveness.
- Conceptualized and built custom CMS/Admin Panel for PolicyBazaar Life, enabling efficient management of content, users, and site operations; earned a **prestigious award for independently delivering the CMS/Admin Panel.**
- Won **Employee of the Month** award for effectively collaborating with cross-functional teams & stakeholders to align technical development with organizational objectives and **delivering project in 3.5 months** against the 4 months deadlines.

Sr. Software Engineer | SAFE Security   **Jun'17 – Feb'19**

Project: India's First Cybersecurity Product - SAFE (Lucideus)
Responsibilities & Significant Achievements:

- Pioneered the development of India's first cybersecurity product; joined the startup as the **second member of the founding team** and played a key role in conceptualizing and **building the product from scratch**.
- Led a **5-6 members' team**, contributing to the foundational **product architecture and product roadmap**.
- Designed and developed the product using a robust tech stack, including **CodeIgniter, MySQL, Redis & RabbitMQ**, ensuring scalability, reliability, and high performance.
- Implemented **patented algorithm for SAFE score calculation**, unique feature that sets product apart in cybersecurity domain.
- Enhanced the user experience by building a seamless, **data-driven interface** powered by **advanced backend technologies**.
- Recognized as **Youngest Top Team Leader** & honoured with **Extra Miller Award** for consistently improving & achieving over **95% performance** while meeting project goals.

Software Engineer | Unyscape Infocom   **Jan'16 – Jul'17**

Project: PHP and Word Press Project
Responsibilities & Significant Achievements:

- Utilized **Bootstrap** to create responsive, user-friendly interfaces and ensure seamless integration with back-end systems using **MySQL** for data storage and retrieval.
- Managed and collaborated on code repositories using **Git and GitHub**, ensuring proper version control, code reviews, and streamlined deployment processes.
